Abreeze Link for MailChimp

by Abreeze Technology

## Finally! A way to connect data from Clover with Email!

Abreeze Link is the easiest way to connect in-store purchases with your email marketing in MailChimp. Not using MailChimp yet? No problem! It is free and easy to use, and Abreeze Link takes care of all of the tough stuff. Abreeze Link automatically sends transaction and customer information from your Clover POS to MailChimp.

Abreeze Link connects the customer data you collect in Clover with MailChimp, one of the most powerful email tools out there.
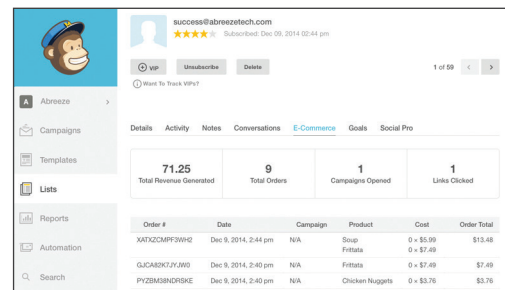

MailChimp has over 7 million users for a reason—they make it simple and easy to drive sales through email

*We make your data simple and manageable so you can send emails to specific groups of customers.*

Synced data includes customer name, email address, items, categories, total spent, and it even connects historical purchases

It only takes three clicks to set up Abreeze Link for MailChimp, from there we update your MailChimp list automatically

MailChimp's visual dashboard tracks customers' email engagement, so you can see whom your message gets through to
